The Red Carpet Dewey Skin Look WITHOUT the crazy price

Every time we see celebrities walking on the red carpet we all notice the same thing. Sure, you appreciate their outfits and how well they coordinated with their partners...But *really* we see their skin and how the flashing lights reflect off their iridescent, glowing skin.

Of course, we don't all have thousands of dollars to shell out on monthly facials and expensive skin routines.

-But what if you can get that dewy skin *without* spending a whole paycheck?

Yes, it's possible! Use these strategies to give your skin the glow it deserves.

1. Wash your face every night

Sounds obvious but it's *so* important. It's so common for us to under cleanse and over moisturize and the daily build up of simple activities can have your skin clogged without you even knowing and that is the exact way to ruin a good makeup look.

Remember, skincare is the *foundation* for glowing makeup and you can't cover it up and nor should you. Always start with a fresh face :)

2. Clean your pillowcases

NEVER forget to wash your pillowcases. You could be doing everything right but if your pillowcases aren't clean it will cause dirt and oil buildup as you sleep. Don't allow yourself to do all the work just to forget a clean pillowcase. I have been there, wondering why my skin is still breaking out even though I have been washing my face consistently. The culprit? MY pillowcase- be sure to throw them in while doing laundry. :) Your skin will thank you later, trust.

3. WATERRRRRRR! *spongebob voice*

Health always starts from the inside out.- keeping yourself hydrated is key. Curious how many ounces you need to be drinking? Divide your body weight (lbs) by two. The answer is how many ounces you should be drinking daily.If you don't really love the taste, consider adding lemon but when in doubt, drink water!

4. Sunscreen, babe.

The sun's rays are so much more powerful than you think. Using sunscreen will protect your skin from getting sun spots, dark spots, and growing older with tons of wrinkles. You may not think you need it because you don't get sunburnt easily but the sun's rays are so powerful and can cause unwanted spots on your skin and then will affect that dewy glow.

"Ready to give your skin a refresh? Go try these tips and use them daily! Though it will take some time, using these simple and "easy on the old wallet" tips will have you strutting down any red carpet in no time. Rooting for you to achieve that skin glow that will make you smile !
